Instructions for using the personnel system:

1. When the program starts running - the employee will have to identify – as an employee or the personnel manager.
2. Once the employee chooses the right role - he will have to choose whether he wishes to register (create a new employee) or login into one of the existing employees.
3. Once the registration / connection completed - he will be presented with a menu, containing his options for actions + an exit option.
4. Each choice will follow-up with instructions according to the action.

The system is operating to save the employees' details, handle the branches & schedules, and make the shifts assignments & employees' constraints an easier task.
